

IN THE CLAIMS

Claims 1-12 (Canceled).

Claims 13-33 (Canceled).

34. (Previously Presented) A method for displaying a web browsing history, said method comprising the steps of:

displaying a list of names of web sites visited by a user, said list of web site names being displayed in an order based on a time since last visit by said user to the respective web site; and

displaying next to each of the web site names a respective graphic whose intensity corresponds to the time since last visit by said user to said each named web site.

35. (Previously Presented) A method as set forth in claim 34 wherein the intensities of said graphics increase as the times since last visit by said user to the corresponding web sites decrease such that a graphic for a name of a web site which was more recently visited by said user is more intense than a graphic for a name of another web site which was less recently visited by said user.

36. (Previously Presented) A method as set forth in claim 34 wherein said graphics have a color other than a shade of gray.

37. (Previously Presented) A method as set forth in claim 34 wherein said graphics adjoin each other to form a generally rectangular region perpendicular to said web site names.

38. (Previously Presented) A method for displaying a web browsing history, said method comprising the steps of:

displaying a list of names of web sites visited by a user, said list of web site names being displayed in an order based on frequency of visits by said user; and

displaying next to each of the web site names a respective graphic whose intensity corresponds to a frequency of visits by said user to the respective named web site.

39. (Previously Presented) A method as set forth in claim 38 wherein the intensities of said graphics increase as the frequency of visits by said user to the corresponding web site increases such that a graphic for a name of a web site which was more frequently visited by said user is more intense than a graphic for a name of another web site which was less frequently visited by said user.

40. (Previously Presented) A method as set forth in claim 38 wherein said graphic has a color other than a shade of gray.

41. (Previously Presented) A method as set forth in claim 38 wherein said graphics adjoin each other to form a generally rectangular region perpendicular to said web site names.

Claims 42-45 (Canceled).

Please enter new claims 46-53, as follows:

46. (New) A computer program product for displaying a web browsing history, said computer program product comprising:

a computer readable media;

first program instructions to display a list of names of web sites visited by a user, said list of web site names being displayed in an order based on a time since last visit by said user to the respective web site; and

second program instructions to initiate display, next to each of the web site names, of a respective graphic whose intensity corresponds to the time since last visit by said user to said each named web site; and wherein

said first and second program instructions are recorded on said media.

47. (New) A computer program product as set forth in claim 46 wherein the intensities of said graphics increase as the times since last visit by said user to the corresponding web sites decrease such that a graphic for a name of a web site which was more recently visited by said user is more intense than a graphic for a name of another web site which was less recently visited by said user.

48. (New) A computer program product as set forth in claim 46 wherein said graphics have a color other than a shade of gray.

49. (New) A computer program product as set forth in claim 46 wherein said graphics adjoin each other to form a generally rectangular region perpendicular to said web site names.

50. (New) A computer program product for displaying a web browsing history, said computer program product comprising:

a computer readable media;

first program instructions to display a list of names of web sites visited by a user, said list of web site names being displayed in an order based on frequency of visits by said user; and

second program instructions to initiate display, next to each of the web site names, of a respective graphic whose intensity corresponds to a frequency of visits by said user to the respective named web site; and wherein

said first and second program instructions are recorded on said media.

51. (New) A computer product as set forth in claim 50 wherein the intensities of said graphics increase as the frequency of visits by said user to the corresponding web site increases such that a graphic for a name of a web site which was more frequently visited by said user is more intense than a graphic for a name of another web site which was less frequently visited by said user.

52. (New) A computer program product as set forth in claim 51 wherein said graphic has a color other than a shade of gray.

53. (New) A computer program product as set forth in claim 51 wherein said graphics adjoin each other to form a generally rectangular region perpendicular to said web site names.
